SUMMARY

Software Engineer II at JPMorgan Chase with 2+ years building and modernizing high-volume financial systems at enterprise scale. Full-stack background spanning backend transaction processing, fraud detection, cloud infrastructure, and front-end development with modern JavaScript frameworks including React, Next.js, and Nest.js. Proficient across Java, Spring Boot, AWS, and modern DevOps tooling. Seeking a front-end or full-stack role where technical depth meets product impact.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, JavaScript, Python, Spring Boot, HTML, CSS, SQL, PostgreSQL, TypeScript, React.js, Next.js, Nest.js, Vue.js, Tailwind CSS, Drizzle
- **Cloud & Infrastructure:** AWS (Cloud Practitioner), ECS/EKS, EC2, S3, RDS, Lambda, SQS, CloudWatch, Docker, Kubernetes, Terraform
- **Integrations & APIs:** Plaid, Upstash Redis, Resend, Turborepo
- **Practices & Tooling:** CI/CD, GitOps, Jenkins, JUnit, SDLC, Software Observability, FinOps, Feature Flagging, Git
- **AI-Assisted Development:** GitHub Copilot, Claude (Anthropic), OpenAI

WORK EXPERIENCE

JPMorgan Chase | Columbus, OH

Apr '24 - Present

Software Engineer I → Software Engineer II

(Promoted in Jan '26)

- Optimize high-volume transaction processing systems for a Tier-1 financial institution, ensuring stability for global-scale daily settlements. Ensure rigorous adherence to global financial regulations and security standards throughout the implementation of high-availability system updates.
- Enhance fraud detection logic, contributing to a significant year-over-year reduction in operational risk exposure.
- Spearhead legacy system modernization and infrastructure cost-optimization initiatives to improve overall system agility, reducing annual infrastructure overhead through strategic service decommissioning and large-scale system migrations.

Matrix Performing Arts | Powell, OH

Feb '24 - Present

Managing Web Developer

- Design and build the organization's website end-to-end, combining custom-coded front-end components with Squarespace to deliver functionality well beyond what the platform offers out of the box, while maintaining a consistent brand across every update and release.
- Own the organization's Google Workspace administration, SEO strategy, and site analytics across the full org, using performance data to drive real improvements in content, structure, and audience reach.
- Lead a team of designers and developers, serving as the connective tissue between non-technical stakeholders and what actually got built and shipped.

EDUCATION

Tech Elevator | National Live Remote

Sep '23 - May '24

Full-stack Java bootcamp, 800+ hours

The Ohio State University | Columbus, OH

Aug '20 - Feb '23

Coursework toward Bachelor of Science, Consumer Sciences
